

## Billings United Futsal COVID-19 Plan

Billings United is excited to run our Futsal Program this winter. Due to the current COVID-19 circumstances the program will run a little differently than years past. Below are the detailed regulations in place to ensure that we can run this program safely and within the best interest of community health. Upon discussion with Riverstone Health the following safety requirements have been implemented:

### Players

- Players will need to enter through the lobby to the Shrine Auditorium sports hall. Players will need to exit through the side gym exit.
- Teams attending each game period will not be able to mix with players in other game periods. This entry and exit flow will ensure groups remain isolated with one another on a weekly basis.
- All players will be required to follow the face covering guidelines currently in place. This includes, entry, exit, and while on the sidelines as a substitute.
- Substitutes will be placed on opposing sides of the hall, and if numbers exceed 25 will be removed from the hall until substitutions take place.
- All players are required to self monitor symptoms and withdraw themselves from any event night. All players must follow quarantine advice provided to any member of their household.
- Players must bring their own hand sanitizer to game periods and sanitize before and after games and at half time.

### Parents & Spectators

- No spectators will remain in the facility at any time. Younger teams (08 and down) will be allowed to have one parent/manager.
- Parents should monitor their player's symptoms and remove them if they show any symptoms or signs of COVID-19 or have been contact traced for close contact.
- Billings United Staff will be present to ensure that each group has a staff member to manage substitutions, injuries etc and ensure adequate distancing when not actively playing on the field.

### Acknowledgement of Risk

With the currently COVID-19 pandemic in Billings being at very high levels any sports activity does present a risk of infection. All attendees of this program must be aware that Billings United is doing everything it can to ensure that this is a safe and clean environment for our players. However, if your family or player is in the high risk category for contracting COVID-19 they should not attend this program. All players are attending this program at their own risk.
